

**Waste**

We strive to produce as little waste as possible on our jobsites, purchasing product and supplies using the “just in time” model. Surplus paint is returned to our warehouse for safe disposal. We reduce, reuse and recycle where possible. Our office is working to reduce paper use and recycles all waste paper. In 2010 we diverted 32 cubic yards of shredded waste paper from landfill, saving 11,340l of water, 28 trees and 6,642kw of electricity.
